The journey from being Adobe Flash Professional to becoming Adobe Animate CC

With the world shifting towards digitisation, the demand for animations that leverage web standards were growing. HTML5 was so much in demand that over a third of all the animations and graphics developed in Adobe Flash Professional used it. HTML5-based animations were reaching around a billion devices across the globe. By 2015, they had become so popular that Adobe Systems had to rewrite the entire Adobe Flash Professional tool to
