

Drawing hair on the head of your cartoon character on Adobe Animate - II

"Cutting" the hair on the head of your cartoon character on Adobe Animate

Adding more "bangs," creating "ears," and further naturalizing the shape of your cartoon character

The same steps can be repeated to add more "bangs" to your cartoon character's face. To do this, select further rectangular chunks on the horizontal line separating the hair and the face. Alternatively, you can also use [Shift]
