

moth. Fortnite is the clear champion on Twitch while YouTube has the most viewers of PUBG. Twitch accounts for 73 per cent of streaming and YouTube has 21 per cent of the total share. Facebook Gaming, a newer entrant, accounts for 3 per cent but has the highest growth rate of 210 per cent.

Facebook gaming is a goldmine of opportunities for marketers and influencers. Brands with gamers and streamers as target audiences can use the platform for effective marketing.

Streaming platform hours watched: 2018 vs 2019			
Platform	2018	2019	YoY Growth
twitch	7,777,879,411	9,340,229,175	20%
YouTube GAMING	2,310,000,000	2,681,436,455	16%
facebook gaming	114,754,621	356,242,965	210%
mixer	142,223,690	353,777,685	149%

However, we are soon going to see a gaming future that is totally platform agnostic, a future in which gamers can play whatever they want, whenever they want, on any device they choose, without the burden of hardware requirements. As high-quality graphics becomes available via the cloud, people will be able to access game content wherever they see fit. This presents a future in which the content takes precedence over the device, hardware, or service it is played upon.

Emerging Markets

According to data by YouTube, 6 of the top 10 live streamers by views in 2020 are from India. MortaL leads in India followed by Dynamo King, Scout, Total Gaming, Gyan Gaming, Soul Regaltos have made this list. Most of the players in this list are PUBG players, making the game the most played as well as the most-watched.

According to Vamsi Krishna, Head of Consumer Marketing (South Asia), at NVIDIA, “In India, the whole industry is led by mobile gaming, followed by PC and Console gaming. Mobile gaming has taken the lead in terms of getting close to 250 million mobile gamers in the country”.
