## Webcams and cameras for your streaming setup

**Y**ou need the best equipment to be a part of Twitch or Facebook live. Though you can record your video and live casts with a mobile device, webcams are dedicated devices for live streams.

An advantage of webcams is their 1080p resolution at 60 FPS (Frame Per Second) that is not available on a lot of mobile devices. Thus, webcams are on the top of the list when it comes to choosing a device for live streaming.

There are a lot of webcams in the market with different specifications and options. It is difficult to choose the best webcam for live streaming. Webcams and video cameras have similar features, they just differ in cost. Webcams are available in different models to suit everyone's needs.

Professional live streamers need a good quality webcam for live streaming their projects and games on popular social media like YouTube, Facebook
