

mobiles and monitors. It is easy to mount on the monitors and laptop screens. Automatic light adjustments are available in the C310. You can customise the frame and use it as a motion detector. Logitech C310 is a solid camera for beginners.

- FOV: 60 degrees

Pros:

- It is affordable.
- Picture quality is decent.

Cons:

- 1080p is not available.
- Tripod mounting is not there.

Logitech C310

3. Microsoft Life Cam Cinema

The Microsoft Life Cam Cinema is a great budget 720p 30 FPS webcam for Twitch and Facebook live streaming. It has excellent features, which are designed to work with the Windows operating system. The glass lens is very accurate and provides a clear image. The camera can rotate 360 degrees for an all around view. Face tracking, automatic colour, and brightness adjustments are some of the notable features.

- FOV : 73 degrees

Pros:

- Fits well in the budget.
- 720p and 30 FPS videos.
- 360 degrees swivel.
- Noise-canceling technology.

Cons:

- It cannot be used for higher resolution recordings.
- Is not compatible with Mac out of the box.

4. Logitech C922 Pro Stream

C922 Pro Stream webcam from Logitech has two streaming qualities to choose from. You can either shoot in 1080p at 30 FPS or 720p at 60 FPS.
