

Pros:

- Excellent picture quality with a resolution of 1080p 60 FPS.
- Works well in low-light.
- Face tracking is much better.
- Compatible with Windows and Mac.

Cons:

- It is expensive.

Logitech Streamcam

## 2. Logitech BRIO

Logitech BRIO is a technologically advanced webcam that can produce a professional-quality video. It is very suitable for web conferencing, live streaming, and recording. It is one of the few 4K UHD cameras with high resolution and frame rate. Use BRIO to capture the entire conference room at a wider 90-degree angle. It has three angle options for capturing shots, larger groups, and larger areas like 65, 78, and 90 degrees, respectively. BRIO can be mounted on all gadgets, and you can also use it with a tripod.

- FOV: 90 degrees

Pros:

- Excellent 4K resolution.
- It works well with any software available in the market.
- High contrast scenes are dealt beautifully with this cam.

Cons:

- It is expensive.

Logitech BRIO UHD Pro Webcam

## 3. Logitech C922X HD Pro Stream

YouTubers prefer the C922X for the stark improvements that it brings over the earlier version. It is the better version webcam to fulfil the requirements of the veterans on Twitch or Facebook Live. C922X records vibrant colours at 1080p or 720p at 60 FPS. It has background enhancement and replace-
