

Cons:

- Default menu settings limit the imagination.

3. Sony a6600

Sony a6600 is the world's fastest alpha camera with 11 fps shooting and a CMOS image sensor. It is one of the best full-frame cameras with enhancement features in every niche. It is a small size lightweight camera with better image stabilisation and weather sealing.

Pros:

- Full frame camera.
- External headphone and mic jacks.
- Touch tracking.

Cons:

- It is expensive.
- Does not shoot in 4K.

4. Canon EOS RP

Canon's EOS RP is their lightest full-frame camera. It has a 4 FPS continuous shooting feature. Other features include Wi-Fi, Bluetooth, and 4K recording options. The touch screen is LCD with a CMOS sensor and a DIGIC 8 image processor.

Canon EOS RP

Pros:

- Excellent tracking performance.
- 4K recording.

Cons:

- It has a slow frame rate and is not suitable for wildlife shooting.

5. Sony a7R IV

Sony a7R IV is a 61-MP full-frame camera with a CMOS sensor and BIONX image processor. It has a 567-point phase-detection system and 5-axis
