

light cater to your different needs of photography, selfies, and live stream videos. Each light has a 360-degree phone holder, which makes it suitable to be used along with your smartphone.

2. Venganza big LED ring light

This light is easy to use when it comes to your video and photography needs. Being powered by a USB cable, you can charge it easily by plugging it with a computer, laptop, or power bank. It offers three different lighting variants, i.e., white, natural, and warm, to help you achieve the perfect picture. It comes with a flexible phone holder, which can be adjusted to different angles such as portrait, landscape, or downward-facing. You can adjust the brightness and colour temperature with a dichromatic LED by simply rotating the ring light without worries of replacing any filter.

3. Big LED ring light

The LED ring light is suitable for live video streaming and selfies as it is loaded with functions like beauty face, beauty eye, skin brightness, and light fill. The LED ring light can be adjusted for three colour temperatures and is equipped with different heights and angles to help you capture better images. The light is powered by USB and supports most of the devices. It also offers a flexible phone holder where you can place the phone inside the
