

On the other hand, you can also opt for frosted light bulbs to help you create the right kind of lighting. You can get clear light bulbs that produce natural warm light and meet your filming requirements.

2. Mainstream

If you are looking to upgrade the lighting set up, you can check the following live streaming gear to take your game to the next level:

1. Osaka bi-colour LED video light

Osaka is one of the top video and photo equipment manufacturers and features a bi-Colour LED light with 300k-5600k dimmable 529 led beads. The professional lighting series features a dimmable USB LED video light kit and a colour temperature setting to adjust the picture quality. It has a long-lasting battery of 8000 mAh, which means you can enjoy non-stop video shooting. With built-in barn doors, you can control the shape and spill of the light beams, making it perfect for vlogging, videos, and photography.

2. Digitek professional LED ring light with light stand

This professional light comes with a 6-foot adjustable light stand to help you capture a video from multiple angles. It is compatible with Android, iPhone, and digital cameras. The ring light supports 360-degree rotation, and for photographers, it has a hot shoe adapter included, which fits on as a standard accessory on the stand. It offers dual colour modes with variable colour temperatures from 3200 to 5600k and runs on two optional Sony lithium-ion batteries, where no power supply for the ring light is available. It is easy to operate with button controls for intensity and colour temperature control and has a supportive stand to place the ring light anywhere.

3. Sonia 3-step trillite continuous video light kit

This Trillite kit suits all your photo and live-streaming requirements. The light source of CFL fluorescent bulbs provides sufficient lighting without any disruption. Get the exact skin tone with a colour temperature of 5200K and control the bulbs' intensity with a separate switch for each of them. It features a built-in fuse to save the light from any excess power and has an additional fuse for backup if a fuse goes off.

4. Simpex professional LED video lights

These video lights are the perfect solution for all your live-streaming needs.
