

- Restream provides a chat feature in live streaming where you can easily read and reply to messages.
- It also has a reply bot that allows cross-platform interaction and integration with streaming.
- Its scheduler feature helps you to schedule the video streaming on a specified date and time.
- The software enables stream and chat analytics to provide metrics on total data consumed and watch time.

XSplit Broadcaster

It is one of the prominent live streaming and video mixing software for content creation, broadcasting, and creating gaming applications. XSplit offers a free version with limited features. XSplit Broadcaster and XSplit Gamecaster are two of its products.

XSplit Broadcaster is a flexible and robust live broadcasting software, while XSplit Gamecaster is exclusive software for live streaming game recording preferred by video game enthusiasts who like to start live streaming with minimum setup.
