

This FastTrack is being broken down into two parts. This month, we'll be looking at the gear that you can invest in and we'll also look at some of the upcoming policy changes that each platform is exploring around copyright and harrasment. In the next month's edition of the FastTrack, we'll focus more on the little tweaks, optimisations and situation specific tips and tricks that one can employ to improve the quality of their streams.

We'll also be looking at monetisation in more detail and hopefully put together a few simple steps that you can follow to start earning off of your streams. As always, we're all ears and eager to hear about your suggestions and remarks pertaining to the FastTrack as well as the rest of the booklets. Please feel free to write to editor@digit.in or hit us up on any of our social media handles. Happy streaming!
