

rise of Steam and other rival platforms, a significant amount of gaming has shifted online and an internet connection is really important even if you require it just to play a video game, much less stream it. In general, to set up a ceaseless, regular, uninterrupted stream, it is important that you have upload speeds of at least 20 Mbps. Any less would mean that the quality of content that reaches your viewers would be downgraded by the platform regardless of the quality that you are relaying to them.

## **2. Platform Support:**

A regular hitch that a number of gamers run into is support of the platform. There are scores of times when the game you want to stream just doesn't run well on the best platform in your opinion. There are times when you stream multiple games, with one running well on one streaming service and another on another. This type of inconvenience can very easily get on the nerves of any serious gamers. It is hard to switch gaming setups again and again on the same day, and can really wear you out. It is hence important that the gaming setup you choose - including both hardware and software - is multipurpose to the greatest extent possible, and allows you to stream all the games of your choice without having to switch time and again.

## **3. Device Support:**

Most gaming content creators have been long time gamers and wouldn't run into this problem due to their sheer experience with gaming. However, gaming novices, who want to get started with streaming, could encounter this problem on multiple occasions. The game, the hardware, and the streaming service are the three main pillars of game streaming. If any two of them are incompatible, the streaming plan fails. It is, hence, really important that the streaming service that you have chosen runs well on the device that you want to play on. Similarly, your game should be available on and compatible with your hosting device. The console that you choose to play your game on should also operate without any hitch on the host device.

## **4. Viewing Experience:**

As a content creator, it is important for you to be aware of how your audience is going to view your content. Generally, veteran gaming content creators will stream on the service that they most frequently use to consume gaming content. This is because they know the ins and outs of the platform, and can expertly manoeuvre around any hitches that they might face. Even if you
