Rules and boundaries are essential while working online.

lead that. Creators must refrain from sharing personal information such as identifiable information like real name, location, ID, etc.

2. Block inappropriate keywords

Platforms twitch offer features such as blocking specific keywords in the backend or by using the chatbot. Chatbots are a great way to keep your chat spam free. They work as a moderator and censor inappropriate comments in your chat. It is helpful, especially for new streamers who do not have human moderators. Make sure you also consider common misspellings as certain trolls attempt to bypass the bots by looking for such loopholes. Along with the keywords, you can also block hyperlinks.
