

the best available in the market. The only way you can do better is to switch to a Twin PC setup but that's going to be a bit more expensive depending on what quality of streams you are hoping to achieve.

Conclusion

Gaming and streaming is hardly a cheap affair, but we have tried to make the whole thing as affordable as possible while still including the best components for that price point. Apart from the one-PC systems discussed above, you can also choose to assemble the two-PC system if you have some extra cash. However, it is hardly mandatory, and the single computer experience gives you everything you need for the best streaming and console gaming performance.
