

2. Emart Collapsible Green Screen - Highest Rated

The Emart Collapsible Green Screen is a popular green screen. It is compact and the fabric remains taut making the background uniform without any creases. The wrinkle-resistant material also helps with reducing creases. If retracted, it can be easily packed and kept for storage.

PROS

- Conveniently to set up
- Does not take up much space once folded up
- Lightweight aluminium frame

CONS

- It is a bit expensive.

One of the best Green Screens that's trending.

3. Fotodiox Collapsible Chroma Key Panel

The Fotodiox Collapsible Chroma Key Panel is a double-sided, blue/green screen collapsible chroma key pane. Having options for the colour is great since you can quickly change the background in case the subject is too similarly coloured or if the host has worn the wrong coloured clothing.

The panel includes a wire-frame stand. The stand is comfortable to hold and facilitates fast and convenient set up. It does not take up a lot of floor space and is less than a kilo in weight so you can easily put it away in a second.

The downside is the comparatively small surface area of this green screen. But, if you want to set up a large scene, like Dr DisRespect does in his streams then you need a larger background.

However, if you live stream from a compact space then this one is right up your alley.

PROS

- Easy to set up
- Fabric remains taut
