

Here's a list of microphones used by some of the top streamers.

- Shroud - Shure SM7B
- V3nom - Elgato Wave 3
- Summit1G - Audio-Technica AT2035

However, if you don't have the budget to invest in such high-end microphones, you can consider buying the Samson G-Track Pro, Zalman ZM-Mic1, or Blue Snowball iCE.

• Video capture card

Although unnecessary, it is helpful to have a video capture card that can capture and record video from your gaming PC and stream it seamlessly with your favourite streaming software over another streaming PC. This helps take off your primary PC's load as having a single setup for playing games, capturing webcam and game feed can add significant load on the computer.

Video capture cards are also highly beneficial for mobile game streamers. It can effortlessly capture your mobile screen and transfer the

Video capture cards for live streaming and recording.

stream to your PC, from where it can be streamed using streaming apps such as Streamlabs OBS and Game Capture. You can have your games streamed in HD 1080p 60 fps quality easily with a video capture card.

Elgato is a famous brand in the video capture card market. It offers various hardware devices that can easily plug into your existing setup, either through USB or PCI Express slots.

• Transitions and overlays

Transitions and overlays can add to the visual appeal of your stream. Streamers need to have overlays for notifications such as new subscribers/followers, donations, and a subscriber or viewership counter. Having overlays keeps the audience engaged and provides them with a way to interact with you through super chats and offerings. You can even have a text-to-audio setup that reads the viewer's message for a specified donation amount
