

pieces of the whole content that one can relate to; transitions tie the things together and improve the content's flow. Transition in most of the content keeps the audience going.

3. Engage and keep the audience attention

When it comes to engaging the audience masses, there are myths and assumptions almost everywhere. Many representatives have always been talking about the Charisma of keeping the audience's attention. Credibility is a great asset to gain attention, but it takes not more than a simplified approach to hold the same. The real key to engaging the audience is to do something out of the box. Also, it refers to the unique ideas that you have to implement before rehearsing the same. You can break your content structure into different pieces and make them highly engaging for your audiences.

You can start your stream with a few personal updates while waiting for the audience to build up for your stream. Then transition into a quick game before interacting with the audience via chat. Here are some pointers for ensuring better engagement.

- **Use the audience's first language** - once you have actively structured your content, make sure to get the message across using whatever lan-

Hold on to their attention
