

Conclusion

Nightbot is a very innovative chatbot that gives a number of new and unique levels of access to both the chat moderators and the stream viewers. Through Nightbot, viewers can experience video game streams in an all new way, and participate in them as well. Chatbots such as Nightbot help streamers and viewers interact in an all new way.

This chapter dealt with how you can configure Nightbot and the various options included therein. We covered commands in Nightbot, configuring giveaways, appointing managers and regulars, as well as setting up AutoDJ and spam protection.

If you are a budding game streamer, Nightbot is a great option for you to interact with the greatest number of viewers during your streams. **d**
