

Key features of Stream Deck

And it's not restricted to just live streaming applications. You can use the Stream Deck with video editing applications, Microsoft Excel and practically any software that uses shortcut keys. Let's look at some of the other features of the Stream Deck.

Streaming Games of Stream Deck

- **Linux Compatible:** Stream Deck devices are not officially compatible with Linux out of the box. You only get the software for Windows and macOS. However, you can use Streamdeck-UI, an open-source package to enable plug-and-play functionality.
- **Multi-device:** Users can easily connect and configure multiple Stream Deck devices on one system
- **Brightness control:** Stream Deck supports controlling the brightness of the device from both, the buttons on the device and from the user interface
- **Configurable button display:** Each button can be configured to display Icon Only, Text Only, or Icon + Text
- **Multi-action support:** Run commands, write text and press hotkey combinations at the press of a single button on your Stream Deck.
- **Folders:** supports multiple pages of buttons and dynamically setting up buttons to switch between those pages
