

- **Video editing** - There are numerous short cut keys in most video editing applications. You could map, let's say, an audio transition from Premiere Pro or a Ripple Delete shortcut.
- **Colour correction** - Adobe Premiere Pro also has Lumetri for making colour corrections to your videos. You can configure shortcuts for the different LUTs and profiles.

Example Stream Deck profile for live streaming

Setting up your Stream Deck Device in Ecamm Live

Let's talk about how to configure your Stream Deck device in Ecamm Live.

One of Stream Deck's best aspects is that it allows users to plug and play at their convenience. In simple words, the users can easily plug it into the device and follow a few steps to configure it.

When you initially connect Stream Deck along with opening Ecamm Live, you will see a message for where you would be required to click 'Install Now,' and you can add this plugin to your device.

You can now scroll down the list of actions in the Stream Deck to find the Ecamm Live session.

Smart Home Controls

The Elgato Stream Deck also allows you to connect to smart home devices and manage them. Homey by Athom is a popular service which connects to over 50,000 smart devices across more than 1,000 manufacturers.
