

The Elgato Stream Deck allows you to integrate with Homey so if you have a smart light or a smart air-conditioner then you can control them remotely with the Stream Deck.

Conclusion

It can be argued that the Stream Deck is an object of convenience. The endless possibilities make it much more versatile than using it for just live streaming. And if you can code, you can always use the SDK to build custom functions. Over time, you might realise that the Stream Deck is less of a luxury and more of a necessity.
