

- Different window managers adapt to various focus models. All of them have the basic function of click to focus.
- A widget is a commonly used term in desktops and mobile phones. It can be manipulated and click in different ways by the user, like buttons, icons, checkboxes, lists, etc. A widget toolkit is a bunch of widgets that develop graphical applications. Some popular ones are Qt, GTK+ which KDE and GNOME use, respectively. So, when the widgets used are different, the applications look different and feels different.

Installing XOrg

You can install XOrg on FreeBSD, Linux, and many other operating systems.

For the FreeBSD operating system, you have to use a package or a port. It is suggested to use a binary package as it is quickly installed and doesn't have many customisation options.

```
# pkg install Xorg
```

To install it from the Ports collection, you can use the following code:

```
# cd /usr/ports/x11/Xorg
```

```
# make install clean
```

```
root@kali:~# ls -al
total 84
drwxr-xr-x  8 root root 4096 Jun 11 05:34 .
drwxr-xr-x 176 root root 12288 Jun 13 18:03 ..
drwxr-xr-x  2 root root 4096 Jun 11 05:34 app-defaults
-rw-r--r--  1 root root   15 Jan  8 16:36 default-display-manager
drwxr-xr-x  4 root root 4096 Jun 11 05:34 fonts
-rw-r--r--  1 root root 17394 Sep 29  2009 rgb.txt

-rw-r--r--  1 root root   601 Jan  8 16:30 Xwrapper.config
```

Kali Linux

Most users prefer to download binary packages because of its convenience. Any of the two examples above will complete your XOrg installation.
