How to use Discord Markdown?

Adding flavor to your everyday text
messages to make them stand out.

Introduction

Many experienced web developers probably know about Markdown or at least some of its syntax. Markdown is a technique that helps to make writing more efficient. However, even if you are not a web developer, you probably know about the Markdown syntax, if not the Markdown markup language, and what it is capable of. When using instant messaging apps like WhatsApp, chances are you have come across some secret tips or tricks of
