

- `<body>`
- `<h1>This is a heading</h1>`
- `<p>This is a paragraph.</p>`
- `</body>`
- `</html>`

Another tool used a lot for coding a web page or email template to format text is HTML. HTML is pretty much used everywhere on the internet. It is more expressive and can achieve some specific effects that may be difficult or impossible in Markdown. However, there's a learning curve to HTML. Like Google Docs, its benefits depend on what you are using it for. You need to know the various tags that HTML provides and ensure that they're all closed properly. This might be easy for experienced users, but it might be cumbersome and unnecessary to learn for a beginner who wants to format text like an email or specific documentation.

Using Markdown in Discord

We shall now see how to write content using Markdown. Markdown syntax is composed entirely of punctuation characters that have been chosen carefully to look like what they mean. So, an asterisk around the word kind of represents emphasis which bolds the text. Markdown lists look like, well, lists. Now Markdown is not a replacement for HTML or even close to it. Its syntax is minimal, and it only corresponds to a minimal subset of HTML tags, but the idea is not to create a syntax that makes it easier to insert HTML tags. The idea for Markdown is to make it easy to read, write and edit pros.

Due to this, markdown formatting syntax only addresses issues that can be conveyed in plaintext. Let's take a look at using Markdown in Discord to format and edit our text. We usually use a hashtag (#) for headings to represent what kind of title we will be using. We typically add a hashtag in front of a word or phrase, and

Discord for communication
