

Besides moderation, MEE6 can also play music on your servers and level up the users. Users who exhibit higher participation unlock their access to exclusive server roles and premium MEE6 bot. You can create your own commands for users and also set personalized welcome messages.

Here are a few basic commands for MEE6:

- `!ban`: A user gets banned
- `!tempban`: Bans a user temporarily
- `!clear`: Delete a messages
- `!infractions`: Displays a user's infractions
- `!kick`: A user gets kicked from the server
- `!mute`: Mutes a user
- `!tempmute`: Temporarily server-mutes a user
- `!role-info`: Get information on a particular role
- `!server-info`: Get information about the current server
- `!slowmode`: Enables or Disables slow mode in a channel
- `!unban`: Unbans a user from the server
- `!unmute`: Unmutes a user
- `!user-info`: Get information about a specific user
- `!warn`: Warns a user

2. ProBot

Probot allows you to set up automatic welcome messages. Every time a member joins your server, he is greeted with a customised message. Similar to MEE6, its automod system immediately detects misconduct and warns the person or kicks him out. Probot allows you to set different commands for varying levels to determine which actions or language lead to removing the person or a warning.

Probot also has 99.99 percent uptime, so you will never have to worry about the bot going down. It has a powerful standalone dashboard for you to view your Discord stats, draft welcome messages, moderate, and set automated responses.

- `#move` - Moves you to another voice channel.
- `#profile` - View your or someone else's customizable personal global profile card.
- `#rep` - Award someone a reputation point. It can only be used once every 24 hours.
- `#top` - Display member's most server score or global XP.
- `#user` - Shows information, such as ID and join date, about yourself or a user.
- `#avatar` - Get a user's avatar.
- `#server` - Shows information about a server.
