

Image: <https://voicy.glitch.me>

Voicy helps you create a more enjoyable experience for you and your audience.

create, and share sound clips and sound effects on Discord using Voicy. With Voicy bot, you and your members can type the commands to have a more entertaining environment. All you have to do is use the command / 'voicy' in the chat.

5. Community Hubs Beta

Community hubs discord bot enhances the way you communicate across many servers and different platforms. It connects a Discord channel to a hub room with other channels. In the hub room, all the channels can share information amongst themselves. You can hang out, watch videos, play, or live stream with different audiences at once. It allows different communities to come together.
