

6. Musibeth

Musibeth enables you to play YouTube videos on Discord directly. It allows easy sharing of videos for additional information. You can also set automated commands that share videos for certain frequently asked questions. The creators who have their own YouTube channel Discord bot can help them spread their channel and get more views while informing members of the information they need. Make sure that you don't spam your channel with videos users are not interested to see. The best usage of Musibeth is to play music on the server.
