

text-based role play game to your server. It allows you to create a customised character for yourself, go on adventures, purchase and trade items, interact with gods, marry other players, battle, and more.

13. Arcane

Arcane helps in moderation and leveling to encourage higher server participation. You can configure the leveling system to determine the rewards and expiry. Arcane also has a voice leveling feature so members can level up during the voice chat as well. Arcane's auto-moderation feature can keep a log of the new and leaving members. It can prevent spam and misconduct by warning, muting, and kicking out offenders. It is a very useful tool for influencers. It allows you to send notifications from YouTube to discord for your fans to get notified when you post a new video.

14. MedalBot

Medalbot allows you to earn points and medals by creating content, getting upvotes, upvoting other's content, and chatting. It is an excellent tool for engagement that your audience will love. Medal bot can also detect unwanted spam content and accordingly warn, mute, or kick out offenders. It can blacklist certain words, delete messages and also auto-assign the roles. Medalbot also has a music feature that allows playing songs from YouTube. All its features are free. All you need to do is create a free medal account to access them.

15. Xenon

Xenon bot helps you create and load backups of your Discord server. The backups can be automated or manual. It offers hundreds of free templates that are public and can be used by anyone. The user is free to choose the template and can even create them. The templates offered by Xenon are in several languages and include a structure for categories, roles, channels, and more. With Xenon,
