

Direct `<script>` Include

Registered as a global variable, you can include the script tag after a quick download.

CDN

The latest version is available to use. For learning or prototyping purposes, you can use it with:

- `<script src="https://cdn.jsdelivr.net/npm/vue@2.6.12/dist/vue.js"></script>`

During the production mode, it is recommended to build and link to an appropriate version number. In addition, prevent any unexpected breakage from the latest versions:

- `<script src="https://cdn.jsdelivr.net/npm/vue@2.6.12"></script>`

You can pick the ES Modules compatible build if you are working on the native ES Modules:

- `<script type="module">`

Installing Vue.js with CDN
