

- `</div>`
- `<div v-else>`
- Now you don't
- `</div>`

Similar to **v-if**, **v-else** rendering can also be applied to the template block.

For example,

- `<!-- This div is conditionally rendering -->`
- `<div v-if="isVar == true">`
- `<h1>This is a Heading</h1>`
- `</div>`
- `<!-- v-else on template block -->`
- `<template v-else>`
- `<p>This is a paragraph</p>`
- `<!-- A child component -->`
- `<Hello msg="Hello Vue" />`
- `</template>`

v-else if

v-else if acts as an "else if block" for the **v-if** directive. Unlike **v-else**, it can be implemented multiple times.

For example,

- `<div v-if="type == 'car'">`
- `<p>Car</p>`
- `</div>`
- `<div v-else-if="type == 'book'">`
- `<p>Book</p>`
- `</div>`
- `<div v-else-if="type == 'animal'">`
- `<p>Animal</p>`
- `</div>`
- `<div v-else>`
- `<p>None of the above</p>`
- `</div>`

v-show

v-show is another option for displaying elements. The usage is, however,
