

```

• })
•
• New Vue({
•     el : "#app"
• })

```

Code snippet of template:

```

• <div id = "app">
•     <h2> Slots </h2>
•     <list>
•         <h4> First Slot </h4>
•     </list>
•     <list>
•         <h4> Second Slot </h4>
•     </list>
• </div>
•
• <script type = "text/x-template" id = "list">
•     <div>
•         <h3> Child Component </h3>
•         <slot> </slot>
•     </div>
• </script>

```

The content present within the `<list>` component gets displayed between the `<slot>` `</slot>` tags.

```

• <div id = "app">
•     <h2> Slots </h2>
•     <list>
•         <h4> First Slot </h4>
•     </list>
•     <list> </list>
• </div>
•
• <script type = "text/x-template" id = "list">
•     <div>
•         <h3> Child Component </h3>
•         <slot> Fallback Content </slot>
•     </div>
• </script>

```
