

```

• /* config.module.rule('css') */
{
  test: /\.css$/,
  oneOf: [
    /* config.module.rule('css').oneOf('vue-modules') */
    /* config.module.rule('css').oneOf('vue') */
    /* config.module.rule('css').oneOf('normal-modules') */
    /* config.module.rule('css').oneOf('normal') */
  ]
}

```

Vue supports box rules configurations for SASS, SCSS, postcss, and stylus.

There are multiple theming options you can choose to style the application with. And you are done with theming, you can move on to the dev server with the following code:

```

• yarn serve
// or
VUE_THEME=a yarn serve 

```
