

- `<p class="mobile movie-title">{{ movieChoice.sub-`
- `title }}</p>`
- `</router-link>`
- `</div>`
- `</div>`
- `</div>`
- `</section>`
- `</div>`

With that, our Favourites feature should be functional.

There's more

Take the new UI for a spin. Check to see if all the components are functioning as expected. And feel free to add more features as you deem fit. In the following chapter, we have many more examples and tutorials for you to play with. **d**
