

Interface

Autodesk's MotionBuilder is a 3D character animation software. Its applications include virtual cinematography, motion capture, and conventional keyframe animation.

Introduction

MotionBuilder 3D character animation software for virtual production allows you to capture, modify and replay intricate character animation in an interactive, highly responsive environment. It lets you use a display that is designed for both animators and directors.

The new MotionBuilder 2022 release includes major developer-focused enhancements, such as Python 3 support and other upgrades. This version also contains significant upgrades to the Story tool, as well as a number of other general workflow improvements. The MotionBuilder Python Command Line tool has been greatly enhanced, allowing for additional features
