

of view, and the stage where the animation and models are shown.

Loading files, merging files or assets, and dragging items into the Viewer window from other MotionBuilder windows are all ways to fill the Viewer window.

Resources Window

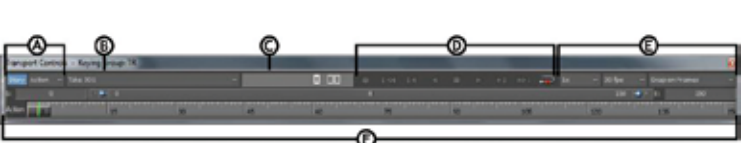

The Resources window offers you access to the Pose Controls, Properties, Filters, Asset Browser, Groups, and Sets. The Asset browser's directory is shown by default in the Resources window.

Resources Window

Transport Controls

Create and choose takes, play and watch the temporal progression of a scene, configure the timing, play, and view options, alter the start and finish of a take, pick and view audio tracks on the Action timeline, and edit visual
