File > Send to Maya > Update Current Scene in MotionBuilder.

The animated rig is loaded into Maya. You can also send the scene back to Maya by clicking Update in the MotionBuilder status bar. You may edit or add new items to a scene, then update the other app by selecting them and pressing the Update button.

Controls

Camera Navigation

1. Orbit

Left-drag to orbit the current camera view around the camera of interest. (Ctrl-Shift-drag)

The camera interest is orbited around the camera by right-drag. (Ctrl-Shift-right-drag)

2. Travelling

Left-drag pans the camera and changes the camera's focus. (Shift-drag)

Right-drag to move the camera without changing the camera's focus. (Shift-right-drag)
