Defining the Character Track

1. In the character track window, you will be provided with thumbnail choices. Select Mia.
2. Open the asset browser. From the right display pane open `walkaroundaround.fbx` file and drag and drop it to the character track panel.

In the panel, the workaround clip is added, as shown in the image below.

3. Start by dragging the walkaround clip from frame 0 to the steps you want to follow up in the loop. The image below shows the clip from frame 0 to

Navigator Window
