

3. Go to the story window track.
4. Double-click the first clip, you will be redirected to the asset settings option.
5. Add a value on “Out” as 15
6. Close the asset setting box and play the animation.

Add a Clip

Once you are done with blending two clips, the next step to follow is adding the clip to the carried out animation.

1. Go to the story window.
2. Click on the character track and zoom the character track by clicking ctrl+drag.
3. Drag the run_boom asset into the Character Track next to the second clip in the Asset Browser.
4. Drag the run_boom.fbx clip to

Frame Start/End

frame 36 to start it (where the second clip ends).

5. Remove the new clip from your selection, by clicking on deselect.
6. Right-click the Character Track in the Action Track and select Frame Start/End from the context menu.
7. Play the animation.
