

Microsoft PowerToys

The need for something different that is faster, better, and reliable is just part of human nature that cannot be suppressed. Microsoft understands it; therefore, they decided to introduce Microsoft PowerToys. It is a collection of utilities specially formulated for computer users who use advanced features, also known as power users, intending to maximise their productivity or add more customisation. This software is a combination of advanced features that

ensures greater proficiency. It is free and open-source software available for Windows XP, Windows 10, and Windows 95.

PowerToys for Windows 10 is hosted on GitHub and licensed under the MIT License that includes 15 powerful tools for power users that are CabView, CDAutoPlay, Command Prompt Here, Contents Menu, Desktop Menu, Explore From Here, FindX, FlexiCD, Quick Res, Round Clock, Send To X, Shortcut Target Menu, Telephony Location Selector, TweakUI, Xmouse 1.2.
