

Windows-Auto-Night-Mode

Changing the system design based on the time of the day has become a new trend that Android, iOS, macOS, and GNOME Shell follows, then why not Windows too? The introduction of Windows Auto Night Mode allows users to be productive when the outside light is dim. Auto Dark Mode enables the user to have a clear, bright, and readable OS that adds more value to the work once the sun sets, the Auto Dark Mode switches that take proper care of the users' eyes and profession.

This app is feature-packed that is easy to use, and ensures a clean interface. When one enables the automatic theme switcher in the app, a task is created in the task scheduler window that sets the theme without any interruption. Along with its exciting features, Windows Auto Night Mode is extremely light in weight and is 100% clean to uninstall.
