

Grammarly

Grammarly is an excellent, easy-to-use tool to write error-free content. It works on a cloud-based system. Grammarly uses AI to identify and suggest solutions for any error that it detects. You can use it to correct the spelling, punctuation, tone, and clarity of the written content. The 'Adjust Goals' option on Grammarly enables you to adjust the goals of individual content pieces before running them through a Grammar check.

Grammarly is a commonly used tool by bloggers, amateur and professional writers. It helps in improving the readability and engagement of any textual document. Grammarly is a simple tool to use. You just need to click on the check grammar option and you will be directed to the main page of Grammarly. You can either type out your content on Grammarly or paste the text to start making corrections. In 2018, a unique feature was added to Grammarly, which allows you to use the application on google docs by adding a browser extension.
