

Keepa

Keeper is a one-stop solution for all Amazon product-related data. It is used to track the price and sales rank of millions of Amazon products. The purpose of this application is to display the chart relating to the price range. It has a Google Chrome extension that shows the previous price and sales rank directly on the product site. It also helps in searching for different products with a high sales rank. Keepa assists by maintaining a list of products according to their sales rank rather than just price.

Keepa also keeps you updated about a product's new offer price, Amazon offer price, number of offers, top-selling commodities, and top-ranked sellers. Keepa can be slightly difficult to understand at first, but once you devote some time to understand the mechanism of this tool, it becomes easy to use. It will help you make the right choice to get good quality products at the best price. It compares the international prices of Amazon products and helps you scan product barcodes.
