

Tweetdeck

TweetDeck is like a personal browser for you to stay connected. It links you with your contacts across Facebook, Twitter, and other social media platforms. It is like a social media dashboard application for the management of your Twitter account. TweetDeck consists of a series of customizable columns. These columns can be set up to display the user's Twitter timeline. It also includes mentions, direct messages, lists, trends, favorites, search results, hashtags, or tweets of a single user.

TweetDeck

Tweet Deck also provides powerful filters and schedules tweets to attract your audience. In addition, it monitors and manages unlimited accounts, and lastly, it stays up to date with notification alerts for new tweets. TweetDeck enables a user to add a total of 200 accounts. One account is selected as the default account to carry out all tasks. Firefox, Dropbox, Google Chrome, Gecko-board, and Franz are some tools that work with TweetDeck.
