

LINUX APPS FOR THE ADVENTUROUS

Make your transition to the best OS even better

Linux has always been a highly customisable operating system that gives the user absolute control over everything. It attracts a different breed of users and the applications that matter to these users are also a little different from what we usually recommend on other operating systems. In this chapter, we're looking at some of these must-have apps that tackle common pet peeves that a lot of first time Linux users face and to help them make a smoother transition to a whole new experience.
