

Reeder

Reeder is the most effective RSS reader for Mac users. It integrates with a variety of third-party services, looks nice, and makes it simple to share information with others. Users may arrange links by subject, project, or other criteria by adding multiple tags to a single item. It puts the software on par with specialized bookmark organizers such as GoodLinks. It allows you to maintain

control of your news reading by combining Reeder, RSS reader, and read later clients into a single program that supports iCloud synchronization.

Reeder is compatible with a variety of online services, including BazQux Reader, Feedbin, Feedly, Feed Wrangler, FeedHQ, Fever, NewsBlur, The Old Reader, Inoreader, Instapaper, and NewsBlur. Reeder supports a three-column layout with collapsible sidebar sections on the iPad. When it comes to speed, Reeder is unrivalled. It can sync with a Feedly account with 4,500 unread items in under a minute.
