

We're instead focusing on the discovery aspect as much as possible. While the essentials were tough to ignore, our focus was to help you make the most of each platform with these apps. And to do that, we went out looking for the latest app on the block that did it all. Certain platforms like Linux still continue to be ruled by the oldies but the other platforms see a lot of newer apps. Some of which have been made necessary in only the last four or five years.

We've spread the love across all platforms equally, at least, as our page counts could permit. A few extra apps will be covered in the chapters that really needed them. We hope that you'll find these apps just as interesting as we did.

Like always, we're open to suggestions about what you'd like to learn in future FastTracks. Write to us at editor@digit.in and let us know. Also, if you're writing to us in the month of August, you even have a chance to win a free Amazon Kindle e-Reader!
