

Nova Launcher

Nova Launcher is a robust, configurable, and adaptable home screen replacement. Nova adds sophisticated functionality to your home screen while being fantastic and user-friendly. Nova Launcher has been around for almost half a decade, and although many launchers have come and gone in this time, Nova Launcher remains at the top of the heap and gets better by the month. Nova is the solution if you want to redesign your home screen or enjoy a cleaner, quicker home launcher.

Nova Launcher is the finest launcher for theming and one of the top launchers on the market. On the Play Store, users may discover hundreds of new icon themes for Nova Launcher. It also gives users much more flexibility than any other launcher, allowing them to snap icons or widgets halfway across the desktop's grid cell. You can customize your app drawer with individual tabs, vertical or horizontal scrolling, and effects.
