

Shazam

Shazam is a useful music recognition app that is undoubtedly one of the most exemplary lyrics applications. Shazam finds fresh and creative methods of delighting its consumers. The app is divided into four sections: Tagging, My Tags, Chart, and Friends. Shazam features a beautiful and easy-to-use UI. Its song identification is accurate, and features like the LiveLyrics function are useful. If you're not connected to the internet, Shazam will store what it hears and look for a match when you reconnect.

Since September 2018, Apple has acquired Shazam, and the app has been ad-free on Android. Every song you tag is saved in the My Music panel, which allows you to access a wealth of information about the music. You can listen to a sample, share it with friends, open it on Spotify or Apple Music, view the music video, explore related music, and discover more songs by that artist.
