

YouTube Vanced

YouTube Vanced is a popular modified version of YouTube in the Android community. It has a lot of features that are not available on YouTube such as ad-blocking, theme settings, automatic repeat mode, offscreen and background playback, among others. You can also change the resolution for your videos and include gesture controls for brightness and volume. The Vanced Manager app simplifies the installation and management of the app by notifying you when an updated version of YouTube Vanced is available and you can quickly obtain the newest updates and install them on your smartphone without having to check for updates regularly.

You can download the YouTube Vanced APK for both rooted and non-rooted devices, and if you download a plugin APK called the MicroG it will allow you to log in to your Google account to sync all of your original YouTube subscriptions and playlists to the YouTube Vanced app.
