

1Blocker

1 Blocker is one of the best and most flexible ad-blocking mobile applications for iOS users. It is packed with features, including a wide array of powerful blocking tools. This application is designed to significantly reduce data usage as well as the loading time, free of cost. By paying a small amount, you can upgrade your application to improve your overall web surfing experience.

There is another customized whitelist that works as an add-on feature in the 1Blocker application. This application works actively with Safari to block and remove obstructive advertisements and banners. One of the best features of this application is that it helps you protect your children from adult content by blocking such websites and social media widgets. With the help of its in-built features, you can also keep yourself protected from data collectors and online trackers.
